# WHAT'S UP WITH DREAMFORGE GAMES?

DreamForge Games makes life fun! We love making easy-to-learn, irresistible games everyone can enjoy.

Five years in the making, our games are sprinkled with a whirlwind of smile-inducing awesomeness that keeps the world coming back for more.

And people do — time and again. People all over the world are playing DreamForge games. They can't stop — and they love it!

For 5 years now, DreamForge has been hard at work creating various casual games — starting from a little flash game called Jade Monkey that sparked a hit multiplayer sequel Jade Monkey 3D, to smash hits like Doom Rails, and Justice that have exceeded our wildest expectations. Read on to learn how we've journeyed from humble origins in Louisiana to global reach...

# WHERE WE'RE COMIN' FROM

It all started about five years ago, with a visionary founder, and an angel investor. MMO games were huge at the time when DreamForge's original founders, Mike Daniel's, and Freddy Nolan, decided to combine their business experience from other companies with their passion for video games.

The plan was to make a MMO game supported by game sales and a monthly subscription base. But when the MMO bubble burst, and iOS freemium games became the rage, they decided to change

the business plan and discontinue production on — Crusades.

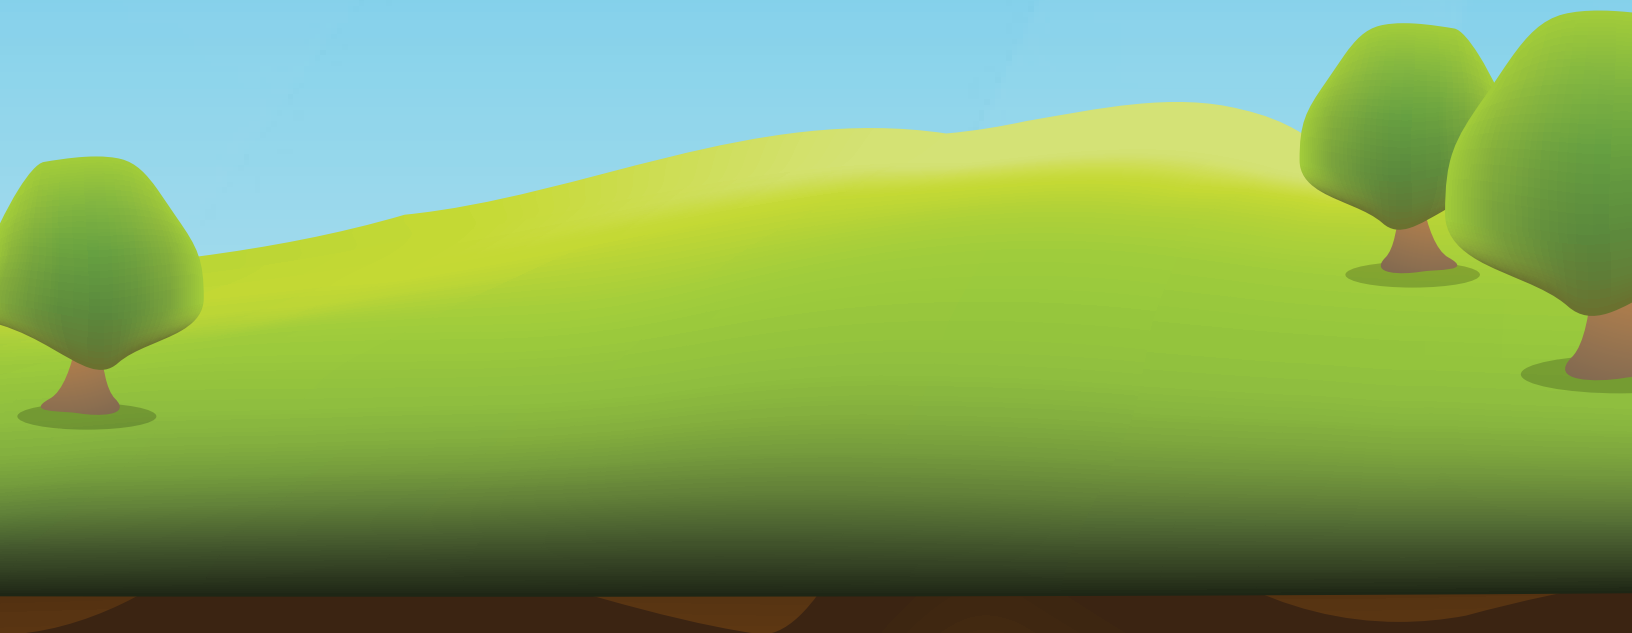

Production started on various smaller mobile and web based games and applications. That's when the radical idea struck like a lightning gem at midnight:

"Why not let people try a basic version of Jade Monkey online for free, and entice them to buy a deluxe version with better graphics, more levels and other awesome additions?"

## SUCCESS

Soon after posting their first downloadable game, Jade Monkey, in October 2007, orders began rolling in. By the hundreds... every hour... day after day... from all over the world.

Jade Monkey climbed to #1 puzzle series on the Mochi Flash portal, and to top 6 in China and France's family games genre on Apple's iOS store. DreamForge's top franchise, and the world's greatest gain in the land of relaxing fun!

# EVERYBODY'S PLAYING

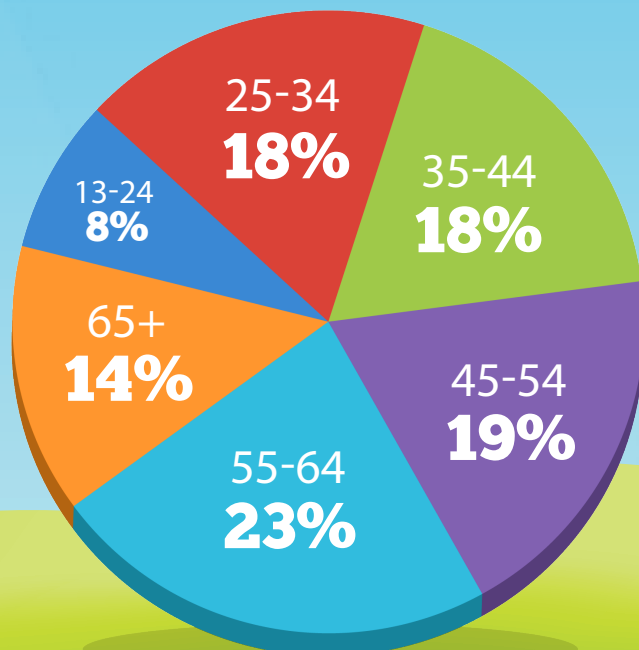

With DreamForge games appearing all over the world, you know there's a huge audience. But what makes DreamForge so special?

Our games transcend gender and age — from kids playing Doom Rails to elderly women playing Jade Monkey to keep their minds sharp and hardcore gamers spurred by the challenging fun of Jade Monkey 3D. Our games appeal to everyone — from 6 to 106.

Our widespread audience allure is bolstered by the ever-expanding ways we deliver games. At first, you could only find our games at [dreamforgegames.com](http://dreamforgegames.com). Now, you can find DreamForge games online at [steam.com](http://steam.com), [mochi.com](http://mochi.com)

They're sold in the Apple App Store, Android Market, Amazon, and thousands of flash gaming portals!

## WHO'S PLAYING BY AGE

# CONSTANTLY IMPROVING

No matter how many different types of customers we find, we're always willing to listen to what the customer wants and implement. We continue to work on each game and applications constantly making updates. We strive to make sure our games are easy to pick up and play. Above all, everything we do is in the name of fun.

Oh, and we're not stopping anytime soon.  
Our audience is growing all the time.
